Innovation in Timber

ClearClad from Arnold Laver is a revolutionary new timber cladding. Ideal for a range of applications, ClearClad is a durable, clear timber that is new and different; but with all the benefits of more traditional cladding timbers. ClearClad is perfect for any job where an 'uncoated' effect is required.

Dimensionally Stable

European Softwood
Siberian Pine or
Scandinavian Redwood

Good, consistent
visual appearance

No decorative
coating required

No staining

Durable - Desired service life
of 30 years (treated in accordance with BS 8417)

Pre-treated preservative
Tanalith M

Improved UV
resistance

100%
CLEAR 100% 'Clear' timber

Certified - CPET
compliant

Timber for every job.

Hardwoods | Softwoods | Joinery Products | Sheet Materials | Cladding | Decorative Surfaces | Engineered Roof & Floor Systems

ClearClad Benefits:

- Stability - Kiln dried (pre and post treatment) for improved dimensional stability.
- Total protection - preservative penetrates the entire timber.
- Superior weathering performance - looks fresher and cleaner for longer.
- FR compatible - may be fire retardant treated.
- May be machined to any profile – without further treatment.
- Easy to install – standard tools and no finishing needed following cutting / nailing.
- Improved installation time – no on-site finishing.
- Standard profiles available immediately from stock.
- Cost competitive.
- Sustainably sourced.

Standard Cladding Profiles:

AL-3 19 x 144mm fin

AL-5 19 x 144mm fin

AL-6 19 x 144mm fin

AL-7 19 x 145mm fin

AL-10 19 x 145mm fin
