WE HAVE THE EXPERIENCE AND KNOW-HOW THAT YOU NEED...

Vicaima brings a wealth of experience to every project providing door solutions that can exceed expectations and meet the most demanding of requirements. Vicaima doors, frames and associated interior joinery products, are manufactured to the most exacting standards, both in terms of design and performance.

With a reputation for quality and innovation in all things, Vicaima creates specific solutions for homes, apartments, hotels, hospitals, schools and commercial projects alike.

Vicaima Limited, based in Swindon, Wiltshire, provides technical support and expertise to Architects, Developers, Builders and other industry specifiers. With an unrivalled range of both standard and made-to-order products, Vicaima offers special doors both in size and design, and a multitude of performance options including fire, acoustic and security doors.

Vicaima focus on excellent customer service and have a Custom Fit Centre to tailor standard doors to meet particular customer needs, including glazing, grooving and many other options on short lead times. Vicaima can deliver direct throughout the country or via selected merchant stockist depots.

This Portaro® and Easi-Fit Brochure has been produced to provide professionals, door kit and set solutions that open up numerous possibilities for a wide variety of interior project performance applications. These solutions offer easy and economical on-site assembly reducing fitting time, improving consistency and quality of the finished installation.

For further information about Vicaima quality products visit our website www.vicaima.com where you will find details of latest developments and new products. You will also be able to download copies of our various literature and technical data files.

OUR COMPANY HISTORY

Vicaima was founded in 1959 and is currently one of the greatest European players in the design and production of crafted wooden building solutions. Our main products are performance veneered doors (fire resistant, acoustic and security, tested and certified to the highest standards), wardrobes, paneling and other bespoke furniture items. From its home in northern Portugal, the group supplies doors and door sets to more than 25 countries globally.

The Vicaima mission is best summed up as a passion for innovation with quality construction. Its determination to exceed customers expectations in these areas is reflected in Vicaima’s achievements in certification and specification, making its timber door and related products highly sought after and widely recognised by specifiers everywhere.
As a responsible and environmentally aware manufacturer, Vicaima promotes the use of technologies and materials which minimize pollution and is focused upon using timber products from renewable and certified forest resources.

Vicaima is certified under the ISO 14001 environmental standard, is a member of the Tropical Forest Trust (TFT), a non-governmental organization (NGO) whose mission is to help companies ensure the responsible management of tropical forests. Vicaima also has available products certified by FSC® (Forest Stewardship Council®), which ensures that they derive from responsibly managed forests and other controlled sources.

Vicaima doors comply with EU Timber Regulation (EUTR), which prohibits the trade of illegally harvested timber and timber products.

Vicaima promotes awareness campaigns internally of its environmental policy, and engages employees in activity which promote “green attitudes” such as the separation of materials for recycling, minimizing waste and electric energy consumption.

Vicaima also invests in a dynamic relationship with the community to which it belongs. Besides its support of local communities, it contributes toward educational projects, charitable groups and non-governmental organisations active within society.

Concern for innovation and quality define excellence in production and guarantee the reliability and fitness for purpose of our products. Testing and certification of technical products, such as fire doors, is a continuous process, which includes annual audits within the factory and marketplace, carried out by Q-Mark and Certifire in independent laboratories.

Innovation and creativity is one of the brand’s pillars. This vision is reflected in some of its innovative creations, like Haute Couture Collection (luxury doors), Portaro Connect® (door and frame with on-line access control system), Surfaceslab (high performance smart surfaces) or various contemporary door solutions that meet the latest architecture trends.
PORTARO®
HIGH-END FRAMING SOLUTION

VERSATILE AND FULLY FINISHED

Portaro® is an unrivalled door system that provides fully finished door, frame, architrave and ironmongery together in one single system.

Versatile and ready to hang, doors and frames are available in a wide range of finishes, creating the perfect harmony between these two pieces.

This concept offers a multitude of door designs and different opening methods, like, sliding, inverse or pivotal doors, and excellent performance options of fire, acoustic and security doors. With great flexibility, this is one of the most adaptable systems on the market, suitable for a multitude of locations and applications.

Available as a Kit or Set solution

CHOOSE VICAIMA WHERE FIRE AND SECURITY COUNTS

Fire Doors play such a crucial role in buildings, both in terms of saving lives and reducing risk to property, and to this end the Vicaima fire door range has been developed to exceed both market and regulatory demands.

All Vicaima Fire Doors in the UK are tested by Chiltern International Fire to BS476 Part 22 (1987) and third party accredited by both the British Woodworking Federation, under the BWF-Certifire scheme and by BM TRADA under the Q-Mark accreditation scheme. As such, all Vicaima Fire Doors can clearly be identified and recognised by looking for the BWF tamper-evident label and BM TRADA Fire Door plug fitted to the doors, so customers can be doubly sure doors and assemblies are compliant with UK fire door Regulations.

Door kits or sets are available with this performance and all ironmongery components are CE marked and certified for use in Vicaima fire door assemblies. These systems include intumescent seals, smoke seals and/or acoustic seals as options.

To meet the aesthetic demands of the project, Vicaima can provide many factory glazed options, overheight doors and a wide range of designs, veneers and finishes.
PORTARO® MK2
FD30(S)

FD30(S) tested door and frame to BS476 Part 22 (1987) by Chiltern International Fire.
Third-party accredited and audited by BM TRADA and BWF Certifire.
Compliant with Part B and Part M of the Building Regulations.

DOOR
Overall 44mm thick with solid core in chipboard
Rails and stiles in softwood, vertical edge banded
Facing in MDF or hardboard according with finish

FRAME
Frame in MDF. Jamb 29mm thick
Intumescent strips 15x4mm
Adjustable architrave with 70mm width

08

09
Portaro® Secured By Design is a multifunction internal front entrance door system, which complies with security standards for a wide range of applications typically including apartments and hotel rooms.

Vicaima SBD door kits and sets, offers PAS 23/24 Secured By Design approval, which certifies that it is fit for purpose and that the door, frame, lock and hardware set, has resisted a variety of physical tests which might typically be used during a burglary.

Vicaima Secured By Design solutions comply with building regulations:

- Part B – Fire resistance tested by Chiltern International Fire, to BSEN 1634-1:2008. Supplied as fire resistant with smoke seal to 30 minutes (FD30S) or 60 minutes (FD60S).
- Part M - Designed to accommodate a wide range of structural openings to facilitate accessibility and mobility.
- Part E – Product construction and applied accessories, provides acoustic reduction as required by building regulations.
- Increased door size options up to 926mm x 2340mm

What is Secured By Design?
Secured by Design focuses on crime prevention of homes and commercial premises and is the official UK Police flagship initiative supporting the principles of ‘designing out crime’.
PORTARO® SBD FD30(S)

SBD FD30(S) tested door and frame by Chiltern International Fire to BS EN 1634-1 (2010) and PAS23/24.
Third-party accredited and audited by BM TRADA.
Acoustic: 31dB.
Thermal compliant of U-Value 2.1 tested according with EN10077-1.

DOOR
Overall 44mm thick with solid core in high density chipboard
Rails and stiles in softwood, lippings in hardwood, vertical edge banded
Facing in MDF or hardboard according to finish

FRAME
Frame in solid plywood. Jamb 28mm thick
Steel L shaped security strip all around the perimeter of the frame

Portaro® SBD FD60(S), is available as a Kit solution, and includes door, frame and ironmongery.
COMFORT WITH A CONTEMPORARY LOOK

Vicaima Acoustic and Fire Resistant Portaro® offer exceptional acoustic and fire attenuation properties, built in to a large range of door kits that perform as well as they look.

Specifically for hotel developments, Vicaima has door solutions with varying levels of acoustic reduction from 33dB to 42dB, contributing to undisturbed comfort for hotel guests. In addition, with fire door features we can get a fire resistance of 30 or 60 minutes supporting safety for people and property.

Dependent upon your requirements this system can be specified with single door, double door and room height configurations, with finishes and security options to complement the development. Other special ironmongery and components are also available that can upgrade the product performance and improve aesthetics, such as, invisible concealed door closer and hinges, electronic locks, eye viewer, glazing options and smoke acoustic seals.

Vicaima has unrivalled customer support and a dedicated project team, specialised in producing customised door and furniture solutions to meet specific hotel projects requirements.

**PORTARO® - ACOUSTIC DOORS**
Vicaima’s outstanding Portaro® Inverse complete door and frame system, has design and performance features which makes this unrivalled contemporary solution an exciting prospect for interior designers and specifiers.

This distinctive system can be supplied with room height dimensions creating a dramatic and beautiful appearance. It can be further enhanced by seamlessly integrating the door – using invisible hinges - into full wall-width panels, to give a stunning contemporary ‘panoramic’ look.

A wide range of finishes are available giving designers a broad spectrum to choose from. This offers considerable design potential whether using veneers or colourful laminates matching as you wish with interior soft furnishings or wall coverings. The door system can complement or contrast as needed.

If fire protection is required, these doors can be supplied as FD30 certified by Chiltern International Fire.
