W201 Blue Liquid

Liquid Colour Floor tiles deliver a high-technology, dynamic floor tiling system, where the material within each tile actually moves as traffic passes across it. The pioneering manufacturing process means that the fluid actually creates individual patterns and effects that present a unique design that changes constantly. This unusual effect makes people feel as if they are almost 'surfing' on the floor.

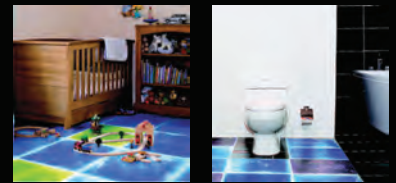

## Design

With a range of colours and styles, this innovative system is ideal for applications where something different is required, such as highlighting an area or making a bold statement. These distinctive tiles allow the designer to be creative and let their imagination soar!

## Uses

Locations where Liquid Colour Floor tiles have been installed include:

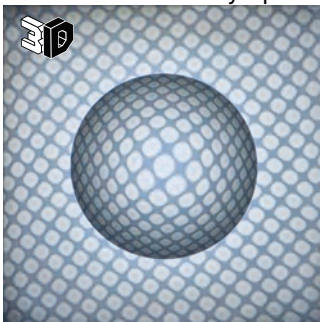

- Cafes and Bars.
- Hotels.
- Retail outlets and department stores.
- Restaurants.
- Nightclubs.

## Product Specification

- Size – 500mm x 500mm x 7.5mm.
- Hard-wearing - Liquid Colour Floor tiles are manufactured for demanding commercial applications.
- Leak-proof - innovative use of aviation composite materials delivers a tile that is 100% leak-proof.
- Safety - cosmetic non-hazardous liquids are used to create a safe product.
- Impact-resistant - the materials are tested to a resistance level of 3.71kg/m2.
- Abrasion resistance - a 3.5mm surface layer delivers a robust surface that is scratch and abrasion resistant.
- Fire resistant – materials are tested to EN13501-1:2007 Bf1-S1.
